2021-present, Holy Greens, Stockholm

- Customer service, fast paced collaborative work, prioritizing tasks and problem solving

## Career goal

### **Now is the only time in my life where my full time job is to**

**learn** - this is the phrase that has stuck with me and motivated me through my years of school. I always imagined that in the future I would just have to *work*, and learning would be left to the side. However, I've been happy to realize that in development, my full time job will *always* be to learn. I am eager to sharpen my skills, and take on new challenges.
